PROFESSIONAL PRODUCTS FOR HOME USE

Effectiveness and safety at home and outside.

ALL THE EXPERIENCE AND THE RESEARCH **inVerde**

SAFE PRODUCTS WITH NO INSECTICIDES

InVerde offers a complete and specialised line of solution to prevent and treat domestic infestation of insects and unwanted pests.

Our products are designed to attract only the targeted insects, ensuring the safety of the environment and of our domestic animals.

All InVerde products are non-toxic and safe, for they do not contain poison.

Our company is enviromentally friendly and we work every day to find new and sustainable formulations.

PROFESSIONAL PRODUCTS FOR DOMESTIC USE

InVerde products are designed specifically for daily and domestic use. Our products are environmentally sustainable and safe for both pepole and pets who share home and gardens with us.

CRAWLING AND FLYING LINE

inVerde FOR YOUR HOME

Products designed for indoor use against pests in bedrooms, bathrooms, kitchens, pantries, and closets.

A SAFE HOME WITHOUT UNWELCOME INHABITANTS

Pests in the home can hide in pantries, cupboards, mattresses, bathrooms, kitchens, sofas and curtains. The first defence for home security is to keep these unwelcome inhabitants away by using repellents, deterrents and food attractants. To intervene in the event of an infestation in progress, it is important to use professional and effective products without dangerous poisons, intervening promptly and safely. Some insects are annoying and hide themselves from view - this is why our ranges also include monitoring systems that allow you to check for the presence or absence of the most insidious insects, such as pantry moths.

TRAP FOR FOOD MOTHS

PRE-ACTIVATED CARDBOARD TRAPS WITH A SPECIAL PHEROMONE.
2 for single flow-pack.

TARGETED PESTS

Food moths

WHERE TO USE

In kitchens, pantries, cupboards, shelves and all places where food is stored.

ADVANTAGES

- Easy to use • With specific pheromone • Attracts only target insects • Non-toxic • Safe for animals and people
- Effective for up to 3 months. • Double use thanks to the double-sided adhesive tape on the back of the trap.

CRAWLING AND FLYING LINE

BOARDS

RODENTS

The specific line to fight pests of garages, basements and attics

Products designed for basements, attics, garages, verandas, and all perimeter areas of the home and garden.

GOODBYE UNWANTED PESTS!

The inVerde line for garages, basements and attics.

Some pests' infestations are dangerous for health and can cause important damage to electrical equipment, engines and objects stored in attics, garages and basements.

Our solutions include both repellents and attractants to prevent and keep away pests, and specific traps studied with the Animal Welfare protocol in mind, to protect the other animals in our garden.

ADHESIVE TRAP, HAZELNUT FLAVORED, FOR DETECTING THE PRESENCE OF CRAWLING INSECTS. IT CONSISTS OF A WOODEN BOARD THAT IS WATERPROOFED ON THE GLUE SIDE.

inVerde FOR YOUR OUTDOOR SPACES

Products designed for outdoor spaces, against pests in vegetable gardens, gardens, balconies, and terraces.

PROTECT YOUR GARDEN AND VEGETABLE GARDEN

Taking care of your house, includes paying proper attention to green areas such as gardens, vegetable gardens, balconies and terraces. Insects and rodents can be dangerous for people and pets health and safety can be guaranteed with preventive actions.

Many insects such as wasps, hornets and larvae represent a serious risk and it's very important to avoid formation of nests and hives.

Effective prevention means making outdoor spaces safe and, at same time, protecting access to your house. In case of infestation we can put at your disposal an entire range of targeted products, with specific features for any type of ambient and insect and guaranteed effectiveness.

Last, but not least, all our traps are Animal Welfare sensitive and are designed not to affect other animal species.

TRAP FOR **VESPIDS** MELATRAP

POLYETHYLENE TRAP FOR DETECTING THE PRESENCE OF HORNETS AND WASPS. ALSO CAPTURES FLIES.
Consisting of 1 apple-shaped trap body, 1 metal hook, 1 transparent lid for visual inspection.

TARGETED PESTS

Wasps, Hornets, Flies

WHERE TO USE

Terraces, gardens, canopies, orchards.

ADVANTAGES

- Easy to use • When used in conjunction with Vespokil, it detects the presence of hornets and wasps. • Also captures flies as a secondary catch.

TRAP FOR TOMATO PESTS IDROTRAP

TARGETED PESTS

Tomato leafminer - *Tuta absoluta*

WHERE TO USE

Gardens and home vegetable gardens

ADVANTAGES

It consists of a red tray with an integrated overflow system that controls the water level. Male insects, attracted by the sex pheromone released from the top of the trap, fall into the water. It can be connected to a drip tray for automatic filling or, alternatively, it must be refilled manually. • It does not use insecticides and only attracts target insects, making it safe for animals and the environment.

PHEROMONE CHROMOTROPIC TRAPS FOR FRUIT PLANTS

TARGETED PESTS

Codling moth (*Cydia Pomonella*) -
Oriental fruit moth or peach moth (*Cydia Molesta*)

WHERE TO USE

Place the trap on the plant about 1.70 m above the ground, using the special clip to hang it, and remove the silicone paper from both sides.

ADVANTAGES

• Easy to use - Insert the cap into the star-shaped hole. The chromotropic action of the yellow color (particularly attractive to these insects) is enhanced by the effect of the specific pheromone, so the insect is attracted and remains stuck in the glue.

PHEROMONE CHROMOTROPIC TRAPS FOR CHERRY

TARGETED PESTS

Cherry fly monitoring - *Rhagoletis cerasi*

WHERE TO USE

Place the trap on the plant about 1.70 m above the ground, using the special clip to hang it, and remove the silicone paper from both sides.

ADVANTAGES

• Easy to use - Insert the cap into the star-shaped hole. The chromotropic action of the yellow color (particularly attractive to these insects) is enhanced by the effect of the specific pheromone, so the insect is attracted and remains stuck in the glue.

TARGETED PESTS

Olive fly - *Bactocera oleae*
Olive moth - *Prays oleae*

WHERE TO USE

Place the trap on the plant about 1.70 m above the ground, using the special clip to hang it, and remove the silicone paper from both sides.

ADVANTAGES

- Easy to use - Insert the cap into the star-shaped hole. The chromotropic action of the yellow color (particularly attractive to these insects) is enhanced by the effect of the specific pheromone, so the insect is attracted and remains stuck in the glue.

PHEROMONE CHROMOTROPIC TRAPS FOR TOMATO PLANTS

TARGETED PESTS

Tignola del pomodoro - *Tuta absoluta*

WHERE TO USE

Position the trap using the special clip to hang it and remove the silicone paper from both sides.

ADVANTAGES

- Easy to use - Insert the cap into the star-shaped hole. The chromotropic action of the black color (particularly attractive to these insects) is enhanced by the effect of the specific pheromone, so the insect is attracted and remains stuck in the glue.

PANEL FOR TRAPPING **FLIES, WHITEFLIES AND LEAFHOPPERS** GOLDENTRAP®

Packs of 10 traps

TARGETED PESTS

Cicadas, Whiteflies, Flies

WHERE TO USE

Gardens and home vegetable gardens

ADVANTAGES

Easy to use - Insert the traps by removing the two protective films and hanging the panel using the ties provided on the support structures. There are holes in the four corners to facilitate this operation. It does not use insecticides and only attracts target insects, making it safe for animals and the environment.

CHROMOTROPIC ADHESIVE TRAP, YELLOW IN COLOR, FOR DETECTING THE PRESENCE OF FLIES, WHITEFLIES, AND LEAFHOPPERS.

General terms of sale

Product features – Modifications

1. The printing of the catalogue is periodic and therefore at the time of order the products may undergo some technical changes deemed necessary and appropriate, without prior notice to the customer.
2. Photographs are for illustrative purposes.

Orders

3. When placing an order is mandatory to indicate the product code and quantity.
4. Following the order, we will send by email the confirmation to be understood as a contractual proposal, containing the product specifications, quantity, price, terms, payment conditions and shipping costs, as well as the expected date of shipment. The client must sign the confirmation and e-mail it within 48 working hours.
5. Payment condition must be agreed with the sales representative and specified in the order confirmation.

Interest rate in case of non-payment or late payments

6. In case of late payment, the buyer shall pay interest on late payment ex L. Decree 231/2002 and damages.

Shipments – complaints

7. Any problems regarding the condition of the packaging, quantity, number and external characteristics of the product must be detected at the time of delivery, in the presence of the courier and indicated on the consignment note, in the copy of the transport document and reported by email to: ordini@geaitaly.it. Any problems and defects that could not be detected by a diligent check at the time of delivery must be reported to GEA by registered mail within 8 days of discovery. Any return of goods must be authorized in advance by GEA, otherwise the goods will be returned to the sender with the cost of shipping.

8. Any complaints, contentions and complaints of defects will not give the right to the buyer to suspend or delay payments of the products subject to the dispute, nor other deliveries in progress.

Delivery terms

9. The delivery times indicated in the order confirmation are indicative only. Any and delays or cancellations due to force majeure do not give right to compensation for direct or indirect damages.

Jurisdiction

10. The exclusive jurisdiction for any dispute is the court of Milan. Each order confirmation must be signed in the appropriate spaces after the wording: Signature Customer.
