

TECHNICAL DATA SHEET

1. TRADE NAME: **MASS TRAP FOR POPILLIA JAPONICA**

Trap for monitoring the Japanese beetle (*Popillia japonica*). The combination of sexual pheromone and floral attractiveness allows the capture of individuals of both sexes.

Monitoring devices for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests' presence in a specific place for a defined time.

2. PRODUCT CODE: **P-04215CIN**

3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

MASS TRAP for *Popillia japonica* is a device for monitoring and capturing the Japanese beetle (*Popillia japonica*), recommended for hobby use in vegetable gardens, small orchards and gardens. MASS TRAP for *Popillia japonica* consists of two attractive dispensers associated with a funnel trap with collection bag.

InVerde products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. CONDITIONS OF USE:

Place MASS TRAP for *Popillia japonica* in gardens and vegetable gardens for the monitoring and capturing of *Popillia japonica*, especially in the period from May to August.

It is advisable to place the trap at least 1 meter high and at least 10 m (and in any case not close) from the plant species most affected by the insect (maple, wisteria, rose, bramble, linden, elm, corn, apple, peach, soy and vine).

Check the trap 2 times a week or more frequently in case of heavy infestations. Empty or replace the bag once filled for 2/3, wiping the funnel to avoid obstruction of the trap.

Replace the dispensers every 6-8 weeks.
