**Glue Area:** 115 x 70 mm

## Quantity of glue on the trap surface: 1,8 g

Colour: As in the picture

## 5. HOW TO USE:

Place Cockroach Trap in the following places:

- Near cable trough and electric boards, dishwashers, sinks, ovens, engines, doors and perimeters, moist and hot environments, and everywhere the presence of crawling insects is suspected;
- In dark areas;
- On the floor or on the wall.

**Theoretical covered area:** at a distance of 5 meters the one from the other, according to the assumed pest infestation.

**Suggested monitoring period:** all the yearlong, especially in the period between April and October, even though, in a conditioned area, insects are dynamic despite their being subjected to seasons.

**Suggested frequency of the controls:** weekly. Change the trap after three months (at the latest) or before according to the pest infestation or the presence of dust, water and/or damp in the environment.

The use of the trap in damp and dusty places could reduce the product functionality over time.

**Storage conditions:** in a cool and dry room, temperature below 25°C and R.H. below 55%. If well stored (intact packaging), the product shelf life is 3 years.

### 6. PACKAGING AND SPARE PARTS:
