Eco-friendly repellent product ready to use for mice and rats.

Monitoring devices for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests' presence in a specific place for a defined time.

2. PRODUCT CODE: P-09069IN

3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

Repellent Mice and Rats is ideal for small and large environments, such as food companies and/or warehouses, roofs, corridors difficult to reach, electrical cabins, engines, stables, community environments, etc.

Used cyclically, it creates an unfavourable environment for the nidification of the rodents.

The product is formulated with synergistic plant extracts strengthened by the MATRIX U.B. that perform a physical barrier action.

Composition:

Aqua, Urtica dioica leaf dry extract, MATRICE U.B.®, Pelargonium graveolens oil, Capsicum annum fruit extract, Piper nigrum fruit oil, Allium sativum bulb oil.

Colour: As in the picture

InVerde products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

TECHNICAL DATA SHEET

5. HOW TO USE:

Ready-to-use product to be distributed as-is by spraying the areas to be protected both inside and outside. It is advisable to use the product to deter the rodent every 15 days, or after heavy rain. Its particular composition allows to spray the product in the most difficult to treat spaces such as on the beams of the roofs where the animals pass, in the corridors difficult to reach, in the electrical cabins, in the engines of the machines, etc.

For preventive action, it is sufficient to distribute the product once a month depending on the spaces taken into account.

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%.

6. PACKAGING AND SPARE PARTS:

- 1 pack of 6 bottles of 1 L

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
