

TECHNICAL DATA SHEET

1. TRADE NAME: **IDROTRAP**

Trap for monitoring the tomato moth (*Tuta absoluta*). Monitoring devices for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests' presence in a specific place for a defined time.

2. PRODUCT CODE: **P-25022CIN**

3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

Idrotrap is a water trap for the monitoring and capture of *Tuta absoluta*, one of the main pests of tomato. The trap consists of a red tray equipped with an integrated overflow system that controls the water level. Male insects are attracted to the sexual pheromone dispensed from the top of the trap and fall into the water.

Color: As in the picture

InVerde products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. HOW TO USE:

Place the trap at ground level. Fill the trap with water until it reaches the indicated level, taking care to add a small amount of liquid soap or vegetable oil. Idrotrap can be connected to a dripper for automatic filling or, alternatively, charging must be done manually. It is advisable to check the traps regularly in order to eliminate the insects present. Replace the dispenser every 4-6 weeks.

6. PACKAGING AND SPARE PARTS:

- Sales unit: 3 traps + 3 pheromone dispensers
- Pheromone spare parts
- Sales unit: 12 packs of 1 dispenser

7. DISPOSAL CONSIDERATIONS:

Disposal must be carried out in accordance with the local, national and/or European legislation in force.
